

Sportdata Clicker System

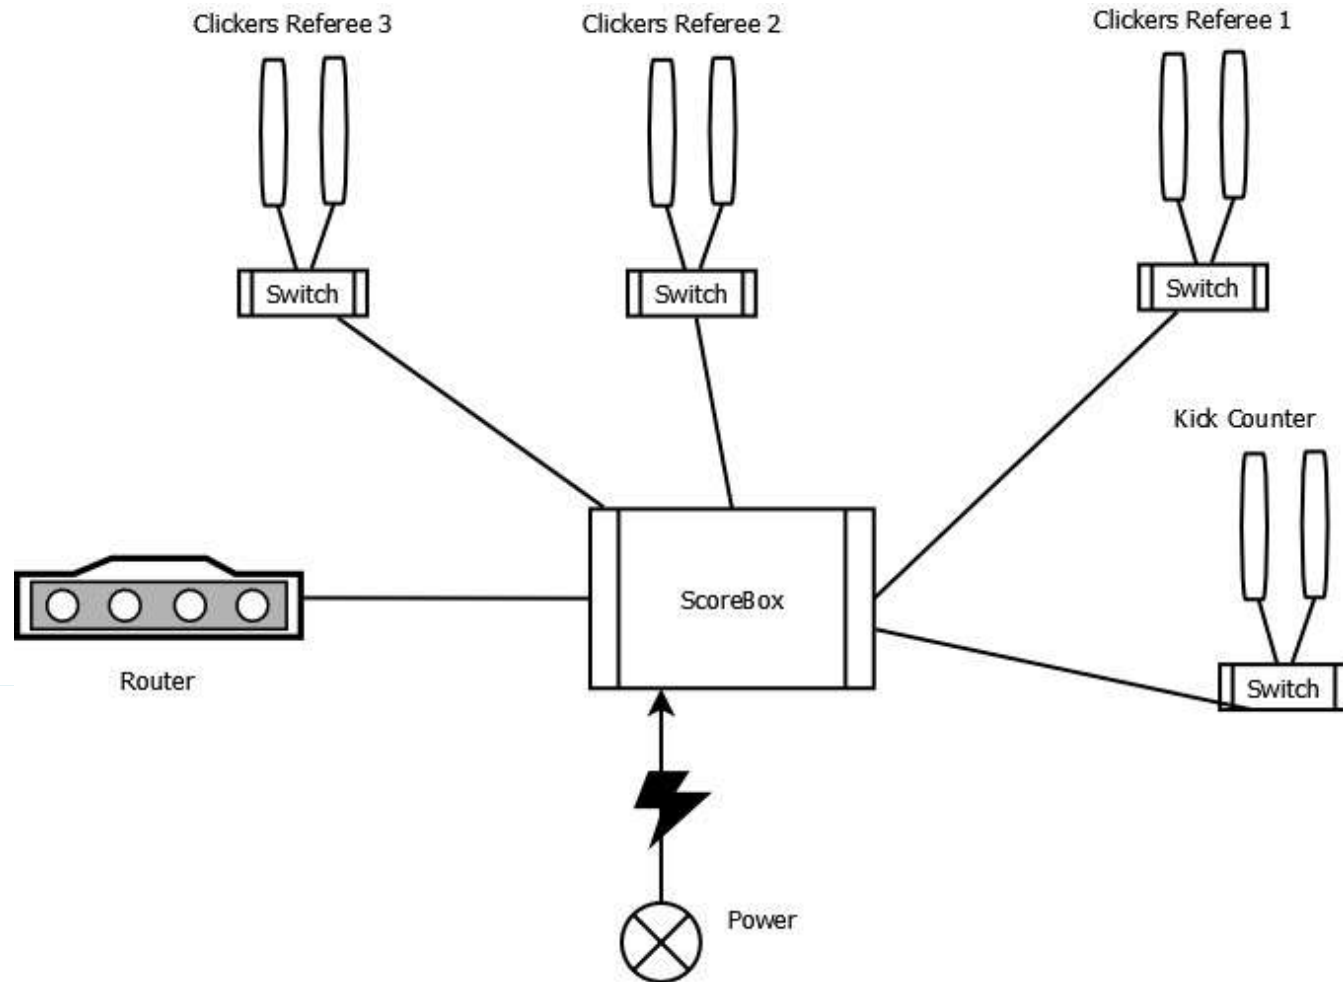

Pre-Conditions

- All SET Point Panel Scoring laptops and the clicker devices have to be in the same network
- The local IP address range is 192.168.1.1 to 192.168.1.255
- All SET Point Panel Scoring laptops have a static IP address
- Reserved addresses for the Clicker boxes:
 - Tatami 1: 192.168.1.12
 - Tatami 2: 192.168.1.22
 - Tatami 3: 192.168.1.32
 - ...

Pre-Conditions 2

- All SET Point Panel Scoring laptops have a disabled windows firewall and any third party firewall software

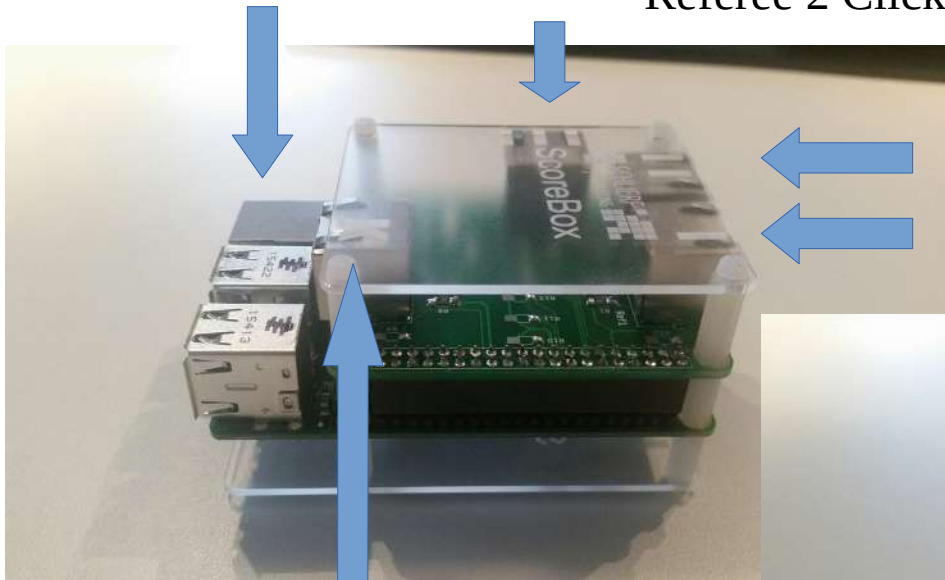

Components

The ScoreBox

Lan cable (from router)

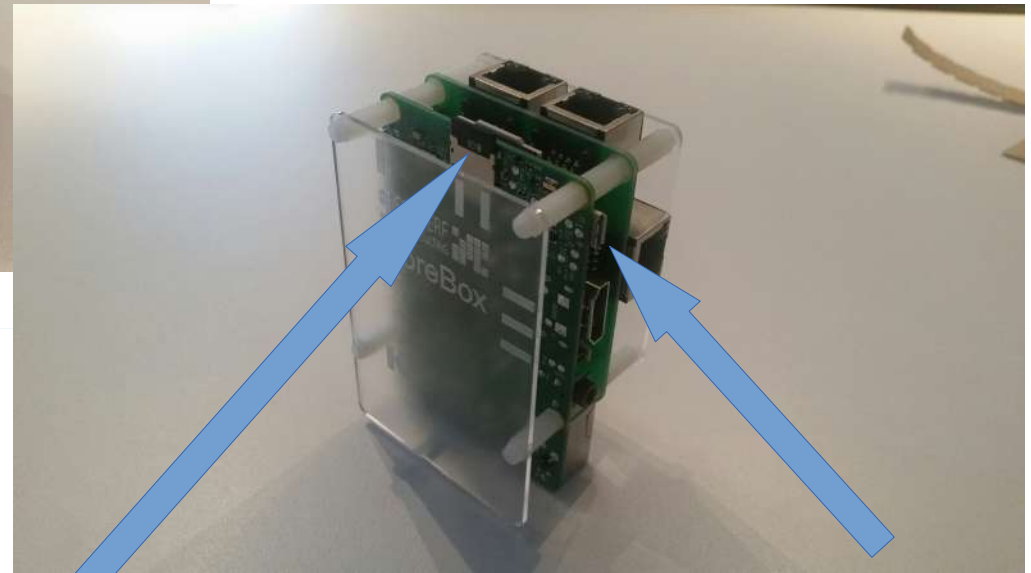

Referee 2 Clickers Lan-Port

Referee 2 Clickers Lan-Port

Referee 1 Clickers Lan-Port

Kick-Counter

Micro-SD
Card Slot

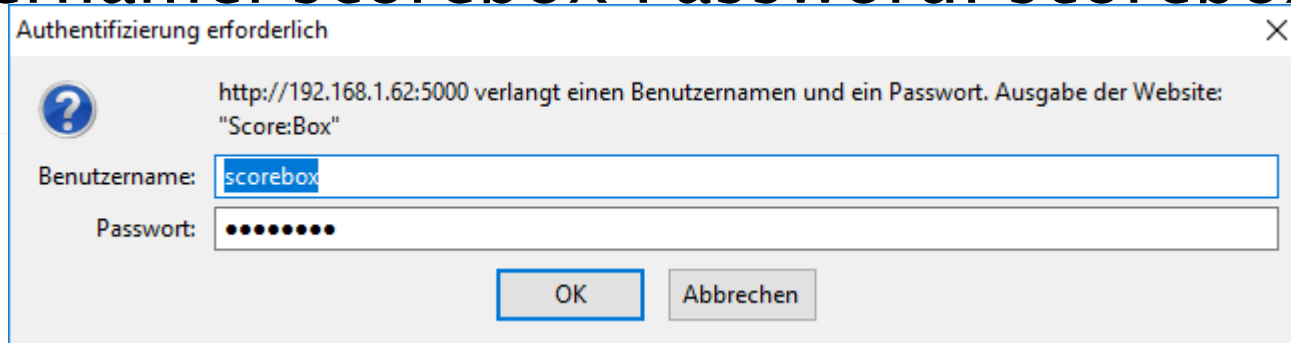

Power Adapter

SoreBox 2

- Before putting the power cable in the SoreBox
 - Make sure your local network is running and configured
 - Connect all lan cables of all referee clickers
 - Insert the Micro-SD Card (software and operating system)
 - Connect the lan cable from the router
- If all cables are connected put the power cable in the ScoreBox

SoreBox Configuration

- › If the ScoreBox is running, you can connect via a browser to the configuration
- › URL: `http://<IPAddress>:5000`
- › E.g: `http://192.168.1.62:5000`
- ›
- › Username: scorebox Password: scorebox

Authentifizierung erforderlich

http://192.168.1.62:5000 verlangt einen Benutzernamen und ein Passwort. Ausgabe der Website: "Score:Box"

SET Scoring Server:

SET Scoring Port: (default:8080)

SET Scoring Pin:

save

check

reload

<-- always reload after save to load changes!

register Referee 1

register Referee 2

register Referee 3

register KickCounter

```
.Referee 1 : no_server
.Referee 2 : no_server
.Referee 3 : no_server
.Kickcounter: no_server
```

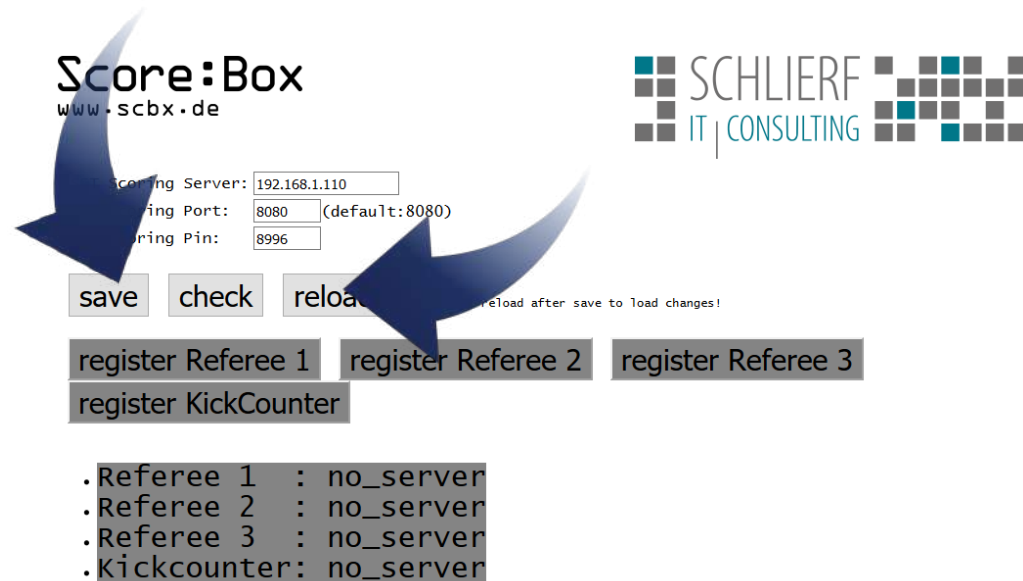

SoreBox Configuration 2

- SET Scoring Server:
 - This is the SET Point Panel laptops IP-Address
 - SET Scoring Port: 8080
 - SET Scoring Pin
 - The pin generated by the SET Point Panel
 - Press the Authentication button in the SET Point Panel.
 - This will create a new PIN code and QR Code for the authentication URL
 - Note: each time you open the Authentication window a new PIN code will be generated for security reasons

Clicker authentication

- If the SET Scoring Server IP-Address, the Port and the PIN are set, save the configuration and press reload
- Click on the referee register buttons to send register requests to the SET Point Panel

The screenshot shows the 'Score:Box' web interface at 'www.scbx.de'. It features a configuration section with input fields for 'Scoring Server' (192.168.1.110), 'Scoring Port' (8080, default: 8080), and 'Scoring Pin' (8996). Below these are 'save', 'check', and 'reload' buttons. A note states 'Reload after save to load changes!'. Further down are four buttons: 'register Referee 1', 'register Referee 2', 'register Referee 3', and 'register KickCounter'. At the bottom, a status list shows: '.Referee 1 : no_server', '.Referee 2 : no_server', '.Referee 3 : no_server', and '.Kickcounter: no_server'. The 'SCHLIERF IT CONSULTING' logo is in the top right corner. Two large blue arrows point from the text instructions to the 'reload' and 'register Referee 1' buttons.

register Referee 1 register Referee 2 register Referee 3
register KickCounter

.Referee 1 : no_server
.Referee 2 : no_server
.Referee 3 : no_server
.Kickcounter: no_server

Clicker authentication 2

- In SET Point Panel refresh the device assignement list
- Assign the device

Clicker authentication 3

- After the assignment and approval in SET Point Panel, click on reload
- If referees are successfully assigned, the „register Referee“ buttons turns into green. Now you can start the SET Point Panel match time and start scoring.
