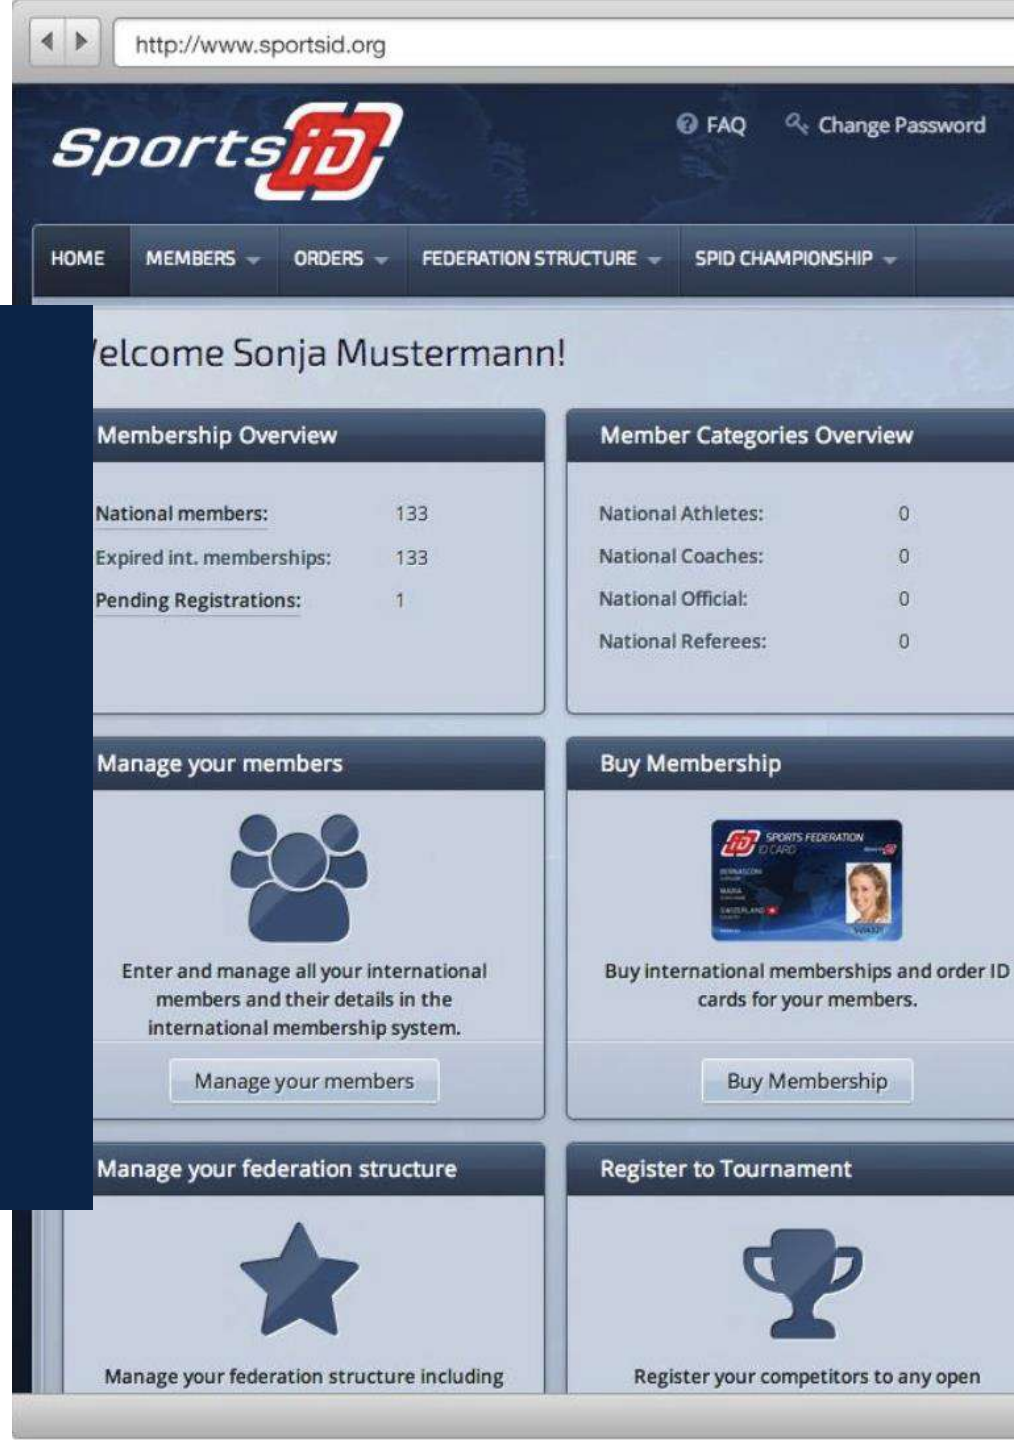
SPORTSID (Membership System)

Overview

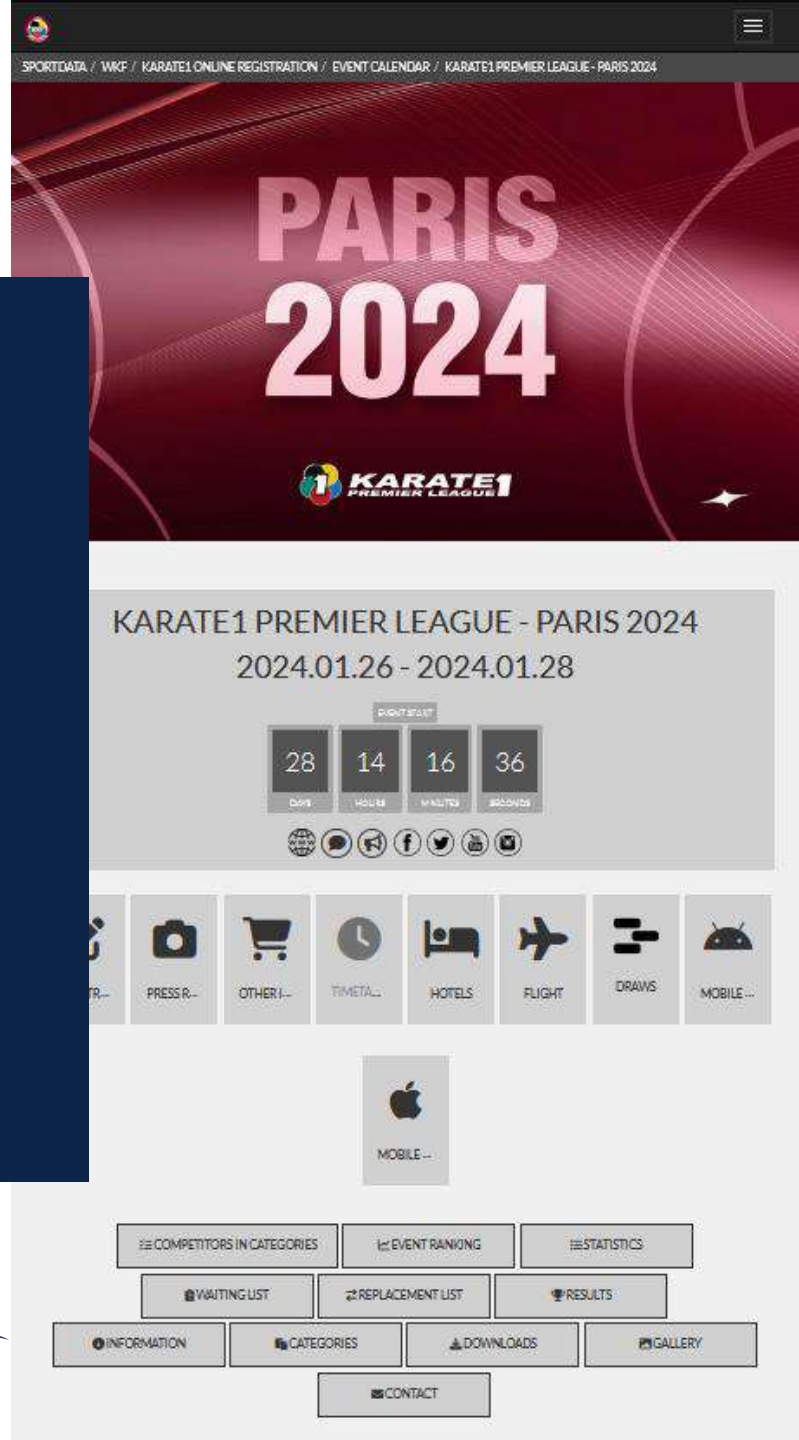
The user-friendly and cloud-based online solution integrates multi-layered membership management, ordering ID cards, secure standards for payment, as well as fast and easy event registration. Sports-ID uses highly secure smartcard technology to ensure the identification and authentication of athletes and officials using mobile and web channels



SET ONLINE (Entry System & Web-results)

Overview

The registration process in sports is pivotal for ensuring fair participation, managing athlete information, and streamlining event logistics. An efficient registration system enhances the overall experience for athletes and organizers, minimizing delays and simplifying the entry into competitions. In summary, a well-executed registration process is fundamental to the success and smooth operation of sporting events.



SET ONLINE
Highlighted Features

The **SET ONLINE** serves as a central hub for enthusiasts, offering detailed event schedules, team information, and results. It enhances professionalism, providing a credible space for sponsors. With **real-time updates** and engaging content, it becomes a powerful marketing tool through social media and email campaigns, offering a seamless blend of information, promotion, and engagement. Click to see more features

Live Results

Keep everyone up to date with the results of the day

Live Schedule

Refer everyone to the live schedule to monitor the progress

Provide extended event information to reach a wider range of potential interested audience

Customize

Let everyone know this is your event with your branding

SET ONLINE
Payments Online

mPAY24 · Systempay Solutions d'avance · stripe · PayPal · GESTPAY

PAYMENT GATEWAYS

Accept payments from diverse customers worldwide and expanding market opportunities ensuring the encryption and protection of sensitive financial information

PAYMENTS TRACKING

Streamlines financial processes, providing real-time visibility into transactions, reducing errors, and enhancing overall financial management

ADVANCED FEE SETUP

Enable advanced entry fee setup on your website to allow dynamic pricing, facilitate discounts for early registration and incorporate late registration fees.

Highlighted Service:

RANKING SYSTEM

Build a Competitive Landscape

Incentivize and give public recognition to your athletes and community

SET Online Integration

Full integration into the SET software framework allows automated & modern TV graphic workflows, thereby keeping on-site staff requirements on a minimum.

Qualification System

Use the ranking to determine qualification quota for championships or international teams.

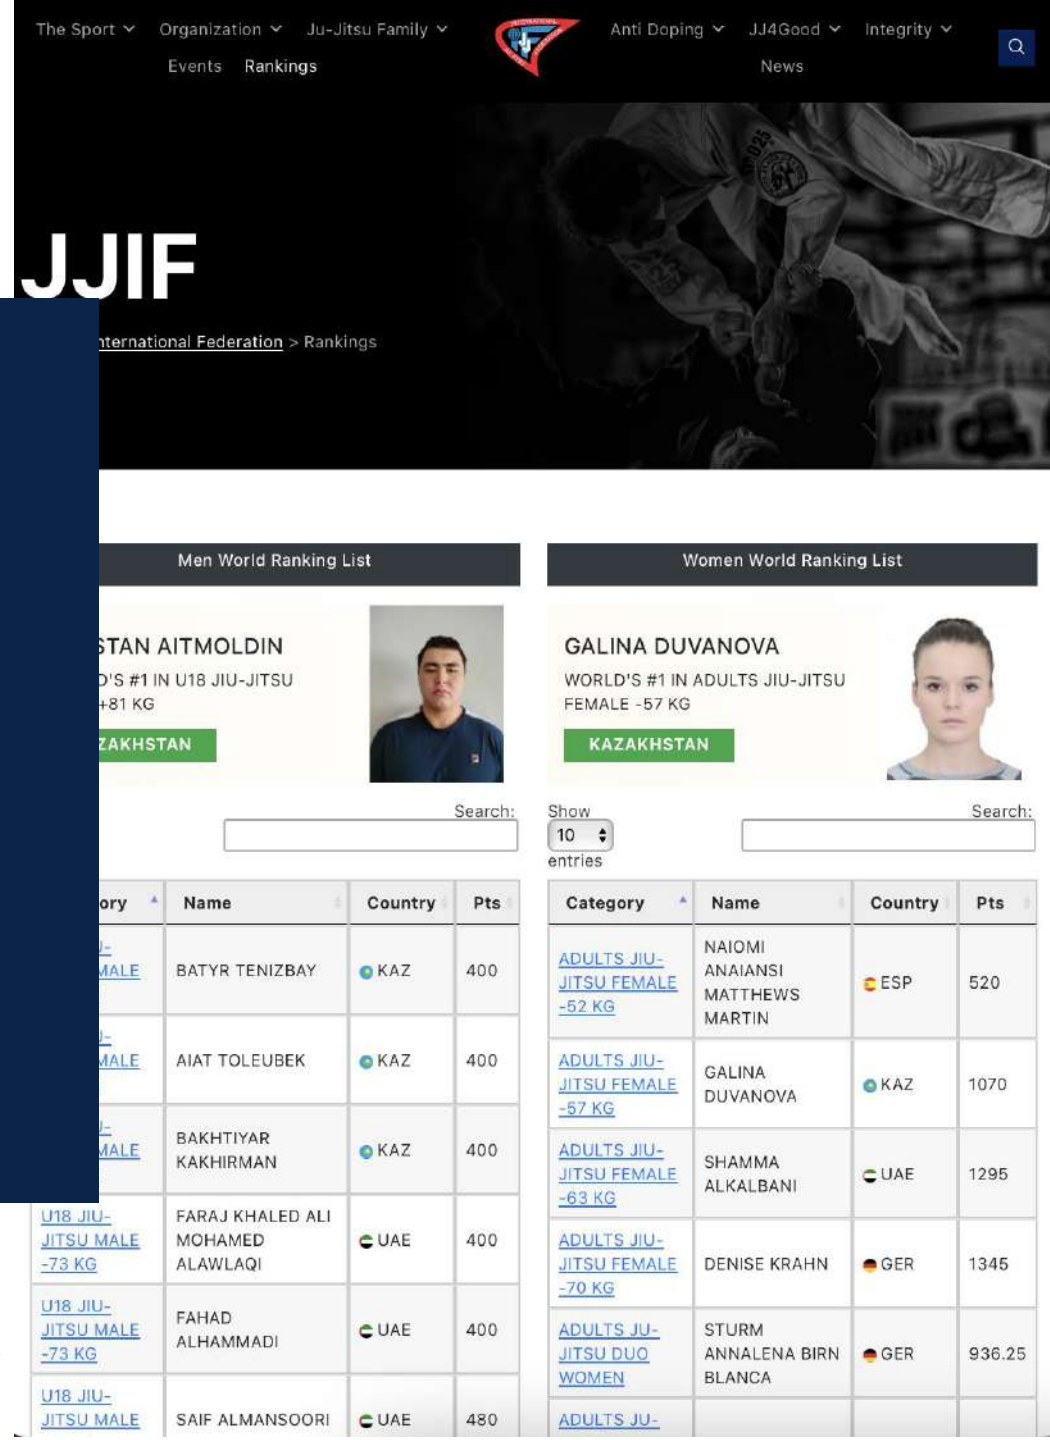
sportdata event technology

WEBSITE INTEGRATION

API - iFrame

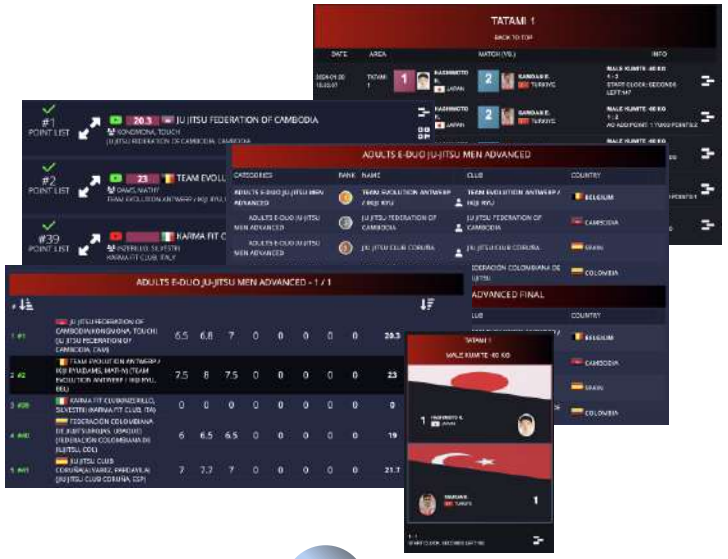
Integrating the schedule, competition results, and ranking information from sport competitions through an API onto your website offers a multitude of advantages. Firstly, it enhances user engagement and encourages them to stay longer on your site..

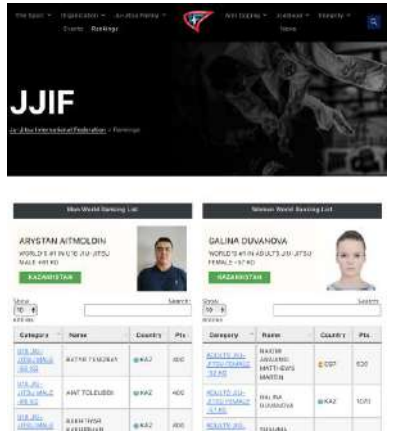
Furthermore, the API integration facilitates seamless accessibility, eliminating the need for manual updates and ensuring that your audience always has the latest statistics at their fingertips.



WEBSITE INTEGRATION

Highlighted Features





SCHEDULE

Maintaining an updating schedule on your website ensures that visitors consistently enhancing user engagement and satisfaction

WEB RESULTS

Regular updates enhance the credibility of your sports-related content, attracting and retaining visitors interested in current and accurate match outcomes

RANKING

A regularly updated ranking system enhances the credibility of your content, attracting users seeking the latest and most accurate information

ACCREDITATION SYSTEM

Overview

Accreditations at major events provide essential benefits, enhancing security, streamlining logistics, and ensuring controlled access to restricted areas for authorized individuals. This system contributes to athlete safety, facilitates efficient event management, and regulates media access, ultimately playing a crucial role in the overall success and organization of such significant sporting events.

ACCREDITATION SYSTEM
Highlighted Features

DESIGN & PRINTING

Conceptualizing personalized accreditation designs to delivering high-quality printed credentials.

ASSIGN ACCESS AREAS

Seamlessly manage, track and verify credentials digitally ensuring effective control over each access area. Know who is coming in and out and when.

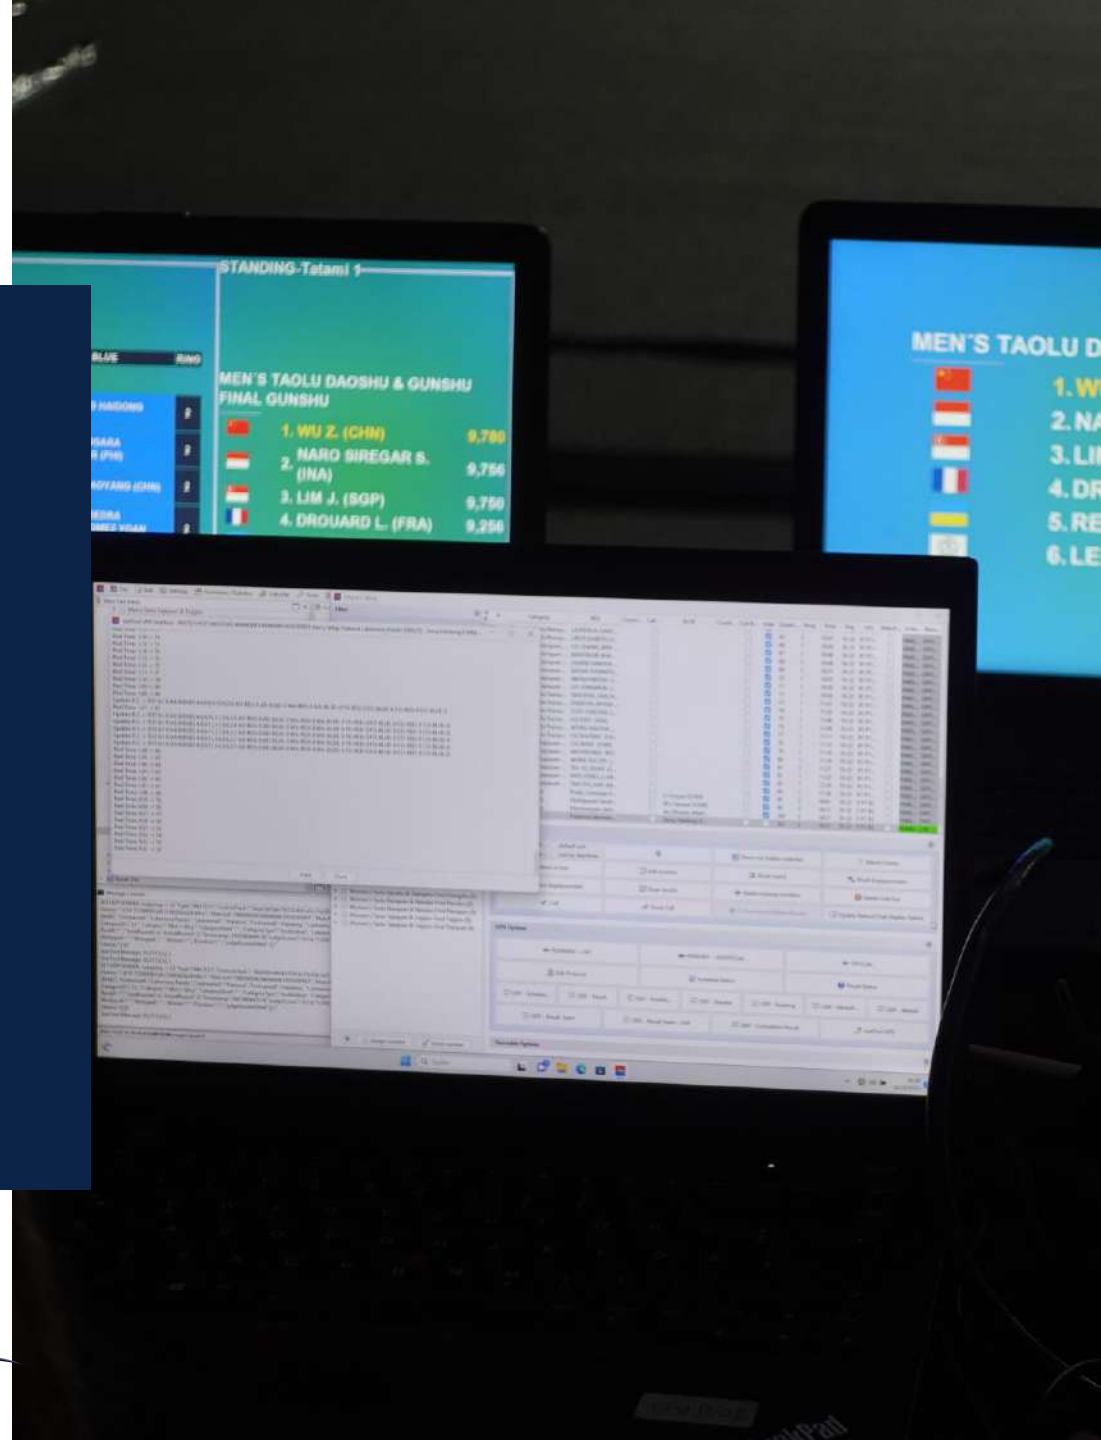
QR CODE READER

Read QR code with integrated camera on your smartphone, tablet or laptop permitting cost effective deployment and controls.

ONSITE VENUE RESULTS

Overview

Implementing an Onsite Result System (OVR) at a sports event enhances the overall experience for participants and spectators. Real-time access to detailed outcomes creates an immersive atmosphere, ensuring accurate data and seamless event management. Immediate results facilitate timely awards and sponsor visibility, showcasing the event's commitment to innovation.



ONSITE VENUE RESULTS

Flow of Information

ENTRY SYSTEM

Members can easily register their entries, manage, and process payments. Customize, configure settings to fit the needs of your event. See Live Results, Schedules and follow your favourite athlete

ONSITE VENUE RESULT

The OVR receives registration and competition data and converts it into different outputs like the draws, schedules, statistics, accreditations, web-results, TV graphics etc.

TIMING & SCORING

From devices at each field of play the competition information is inputted and sent to the scoreboard and centralized in the OVR
